

**Cold****Stomach
Discomfort****Slow-Healing
Wound****Infections****Tired**

Boost Your Immunity with the Right Nutrition :

1. Macronutrients

- Carbohydrates(40%), Protein(30%), Healthy Fats(30%)
- Protein- helps body to produce antibodies to defense against viruses and bacteria

2. Micronutrients

- Vitamins, minerals, antioxidants
- Vitamin C- biggest immune system booster

3. Phytonutrients

- Found in fruits and vegetables to reduce oxidative stress that weakens immunity

4. Prebiotics and Probiotics

- Healthy digestive system with good bacteria can crowd out potentially harmful bacteria

Immunity-Boosting Nutrition

1. Immune system helps our bodies to defend and speed up recovery from illness.
2. Unhealthy diets can cause a tremendous imbalance in our immune system, thus weakening it and increases the susceptibility to new and reoccurring illnesses.
3. Did any of these happen to you recently?
 - a. Catching a cold quite frequently?
 - b. Having frequent stomach discomfort such as diarrhoea, bloatedness, constipation?
 - c. Having wounds that heal slowly?
 - d. Having frequent or recurrent infections?
 - e. Feeling tired all the time?
4. No one food or supplement can prevent illness but you may help support your immune system by including these nutrients in your overall eating plan on a regular basis especially in the form of macronutrients, micronutrients, phytonutrients and good microbiome.
5. Macronutrients include carbohydrates (40%), protein (30%) and healthy fats (30%) which are essential to strengthen our immune system. It is important to include protein in your daily nutrition as it is needed to produce antibodies to defense against invading viruses and bacteria.
6. Micronutrients consisting of vitamins, minerals and antioxidants can support optimal function of the immune system. As one of the biggest immune system boosters, vitamin C encourages our body to produce antibodies that fight diseases. It is essential to maintain daily intake of vitamin C as our bodies do not store or product it.
7. Phytonutrients found in fruits and vegetables reduce our body' s oxidative stress that may weaken our immunity.
8. Besides that, incorporate your diet with prebiotics and probiotics to ensure healthy digestive system. When our system is populated with good bacteria, they serve to crowd out potentially harmful bacteria that might enter your digestive tract.

Muscle Health

1. **Magnesium** : Protein synthesis, muscle function, energy metabolism, muscle relaxation and contraction.

• Food source:

2. **Protein** : Repair and builds muscle tissues.

• Food source:

Bone Health

1. **Calcium** : Major building block of bone tissue.

• Food source:

2. **Vitamin D** : Assists in calcium absorption

• Food source:

Joint Health

1. **Vitamin C** : Aids collagen production and acts as antioxidant

• Food source:

2. **Collagen** : Essential building block for joint cartilage

3. **Essential fatty acids (Omega-3)** :

Anti-inflammatory

• Food source:

Eating right for your Muscle, Bone and Joint

1. Choosing a balanced diet containing the right vitamins and minerals decreases our chances of developing deficiencies later on in life. A lack of proper nutrients increase your risk for bone, muscle and joint conditions including osteoporosis, arthritic conditions, muscle weakness and pain.
2. Muscle health :
 - a. Magnesium - It is an essential mineral that plays a key role in protein synthesis, muscle function, energy metabolism, muscle relaxation and contraction.
Food source: green leafy vegetables, legumes, nuts, seeds
 - b. Protein - 20% of our muscle are composed of protein. Protein helps to repair and build muscle tissues.
Food source: chicken, fish, nuts, seeds, dairy products, eggs
3. Bone health :
 - a. Calcium - Do you know that calcium is one of the main bone-forming minerals? When we do not consume sufficient calcium, our body breaks down our bones to release calcium resulting in loss of bone mass. If this happens for prolonged period -> osteoporosis
Food source: soy beans, dairy products, green leafy vegetables, sardine
 - b. Vitamin D - Assists your body to absorb calcium to strengthen your bones. Our main source of vitamin D comes from what our bodies make on the skin from sun exposure
Food source: cheese, egg yolk, cod liver oil, fatty fish, mushrooms
4. Joint health :
 - a. Vitamin C - Aids in collagen production and acts as an antioxidant to protect us from harmful free radicals that damage our joint surfaces
Food source: citrus fruits, berries, tomatoes, broccoli
 - b. Collagen - Significant component of bones and joints to withstand stretching and deformation. It provides essential building block for synthesis of joint cartilage for maintenance of healthy joints.
 - c. Essential fatty acids (Omega-3) - Reduces inflammatory response to relieve pain and discomfort in our joints
Food source: Oily fish (sardines, tuna, mackerel), flaxseed

28 Superfood for Brain

Omega-3 Fatty Acids

- Build & repair brain cells
- Docosahexaenoic acid (DHA)
 - reduce inflammation of brain cells
 - improve mental concentration & learning

Antioxidants

- Reduce the effect of harmful molecules that cause damage to brain cells (oxidative stress)
- Reduce inflammation of brain cells, delay

Vitamin B6, 12, Folic Acid & Choline

- Essential for proper brain functioning and development
- Essential for mood regulation

Superfood for Brain

1. (Customer' s Name), do you know what kind of food is good for your brain? We call it the superfood for brain.
2. Brain is the control center of your body, it is in charge of keeping your heart beating, lungs breathing and allowing you to move, feel & think.
3. The foods you eat can help to keep your brain healthy and improve specific mental tasks, such as memory and concentration. About 60% of your brain is made of fat, and half of that fat is the omega-3 kind.
4. There are 3 major groups of superfood for your brain:
 - a. Omega 3 Fatty Acids
 - Build & repair brain cells
 - Contains docosahexaenoic acid (DHA) - reduce inflammation of brain cells, improve mental concentration & learning, fight memory loss
 - Examples from natural food sources: Oily cold-water fish: tuna, herring, sardines, mackerel, salmon and trout, Leafy greens: kale & spinach, Eggs, Walnuts, Oils: flaxseed oil
 - Alternative: Herbalife Omega 3 fish oil
 - i. Smaller in size, easy to swallow, coated with rosemary, no fishy smell (Good for children & elderly in improving concentration & fight memory loss)
 - ii. Higher content of DHA & EPA (41%) as compared to normal fish oil available in market (~30%).
 - b. Antioxidants:
 - Reduce the effect of harmful molecules that cause damage to brain cells (oxidative stress)
 - Reduce inflammation of brain cells, delay brain aging
 - Examples from natural food sources: Berries: blueberries, strawberries, blackberries, Leafy greens: spinach, kale, Green tea, Dark chocolate, Nuts: almonds, kiwi
 - Alternative: Herbalife Guarana Tea Powder Plus- Children & Elderly
 - Guarana tea is the common tea in brazil.
 - c. Vitamin B6 & 12, folic acid and choline
 - Essential for proper brain functioning and development, as well as regulating mood.
 - Examples from natural food sources: Eggs

Nutrition For Skin

Outer nutrition include SPF, Vitamin A, C, E and B3

Source of Vitamin C: bell pepper, broccoli, strawberry, kiwi, papaya

Source of omega-3: salmon, tuna, walnut, flaxseed

Source of Vitamin B3: eggs, bean, milk, mushroom

Source of Vitamin A: dairy, meat, eggs, carrot, pumpkin

Source of Vitamin E: seeds, almonds, olive oil, grapeseed, broccoli

Tips for Healthy Skin

1. Unprotected sun exposure is the leading factor in skin ageing and skin cancer. Protect your skin from the sun's damaging UVA/UVB by applying SPF skincare products. You can also nourish the skin by using cosmetic with Vitamins A,C,E and B3 for overall skin health.
2. Skin nutrition is vital to our health because everything we eat ends up in our skin.
3. Protein is important to maintain skin health along with vitamin C which helps to make collagen, the protein that gives skin its ability to stretch called elasticity. So, make sure to meet your daily protein intake as your first step to a healthy skin.
4. Healthy fats such as omega-3 in diet plays an important role on moisturising the skin surface and reduce inflammation. Fatty fish like salmon, tuna sardines and mackerel are good source of omega 3 while walnut, chia seeds and flax seeds are plant based omega 3.
5. Vitamin A can be made from beta-carotene in orange vegetables which is deposited in the skin where it acts to protect the skin from the damaging effects of the sun. Vitamin A from meats, dairy, and vegetables help mature the skin cells.
6. Vitamins C and E are also antioxidants in the skin's upper layers and growing cells. Antioxidants are effective in reducing free radical damage of collagen and elastin, the fibres that support the skin structure, prevent wrinkles and other signs of premature ageing. They can both found in spinach, broccoli and papaya.
7. Vitamin B3 protects DNA in the cells of the skin, helps build keratin that keeps skin firm and healthy. It can be found in eggs, beans, mushroom and milk.

Phytonutrients

Reduce Blood Pressure
And Increase Vessel Dilation

Improve Vision

Decrease Disease-Causing Inflammation

Decrease LDL Cholesterol

Prevent Cell Damage

The benefits of phytonutrients

1. **Phytonutrients or Phytochemicals:** Think of these as natural health-boosters found in plants. They're like the secret ingredients that make plants so good for you!
2. **Plant-Packed Goodness:** You can find these phytonutrients in all things plant-based - from leafy greens and colorful veggies to fruits, herbs, nuts, and seeds. Basically, if it comes from a plant, it's likely loaded with these good-for-you compounds.
3. **Eating a Rainbow:** Different colored fruits and veggies bring different phytonutrients to the table. So, when we say "eat a rainbow," we mean enjoying a variety of colorful produce for a wider range of health benefits.
4. **Superpowers of Phytonutrients:** These plant compounds are like little superheroes in your body:
 - a. They help keep your blood pressure in check and make your blood vessels happy.
 - b. Your eyesight can get a boost.
 - c. They're like firefighters putting out inflammation.
 - d. They battle the bad guy cholesterol (LDL).
 - e. They're the bodyguards for your cells, preventing damage.
5. **Boosting Your Intake:**
 - a. Make it a habit to include fruits or veggies in every meal and snack.
 - b. Sip on green or matcha tea daily for an extra phytonutrient punch.
 - c. Color your plate with vibrant foods like kale, beets, and berries.
 - d. Spice up your meals with turmeric, cumin, oregano, ginger, clove, and cinnamon.
 - e. Snack smart with unsweetened and unsalted nuts, seeds, and dried fruit.
 - f. When you can, go for raw or lightly-steamed veggies; cooking methods like boiling can reduce their goodness.

Now you know, it's not just about eating your veggies - it's about savoring the plant-powered benefits they bring!
